How to upgrade TP-LINK Wireless G Router&AP

Notice:

 Please verify the hardware version of your device for the firmware ver sion. Wrong firmware upgrading may damage your device and void the warranty.

- After you downloaded the firmware from TP-LINK website, please use decompression software such as WinZIP or WinRAR to extract the firmware file to a folder;
- Do NOT upgrade the firmware via wireless connection;
- Do NOT turn off the power or cut down the Ethernet cable during upgrade process;
- Please write down all current settings as a backup and enter them manually after upgrading.
- Internet Explorer(IE) is recommended to upgrade the firmware.

Step 1 Log into the TP-LINK device by typing http://192.168.1.1 in the address bar of the web browser (such as Internet Explorer, Firefox). The User Name and Password are both admin.unless.nc. you have changed it before.

Step 2 Click **System Tools->Firmware**, click the **Browse** button to choose the firmware you already extracted in the folder.

| Firmware | | |
|-------------------|-------------------------------|--------|
| File: | | Browse |
| Firmware Version: | 3.5.4 Build 070809 Rel.31767n | |
| Hardware Version: | WR543 v1 081520EF | |
| | | |
| | Upgrade | |

Step 3 Click the **Upgrade** button. The device will reboot automatically after the upgrading has been finished. Please wait about 3 minutes.

Step 4 Click Status, verify that the router's firmware has been upgraded.

| Status | | | |
|--------|-------------------|-------------------------------|--|
| | Firmware Version: | 4.2.1 Build 090106 Rel.56881n | |
| | Hardware Version: | WR340G v2 08118989 | |

Step 5 It is recommended that restoring the device to factory default to make the new functions take effect; Click **System Tools**->**Factory Defaults**, Click **Restore** Button.

Step 6 After restoring factory default, please login http://192.168.1.1 and re-enter the settings you have written down before upgrading.
